up a 400 MW power plants on coal to gas conversion technology. However, BHEL and National Thermal Power Corporation (NTPC) have plans to set up a 125 MW Integrated Gasification-based combined cycle (IGCC) plant which is based on coal to gas conversion technology for eco-friendly low emission power generation.

Power supply to Chhattisgarh

†1437. SHRI SHREEGOPAL VYAS:
MISS ANUSUIYA UIKEY:

Will the Minister of POWER be pleased to state:

(a) whether Government have reduced the power supply to Chhattisgarh;

(b) if so, whether the State Government was consulted; and

(c) whether power supply will be restored, to earlier level soon/after reviewing the situation?

THE MINISTER OF POWER (SHRI SUSHIL KUMAR SHINDE): (a) There has been no change in allocation of power to the State of Chhattisgarh from the unallocated power of Central Generating Stations of Western Region during the year 2006-07 (April, 2006 to February, 2007).

(b) and (c) Do not arise in view of the above.

Power situation in the country

1438. SHRI SURESH BHARDWAJ: Will the Minister of POWER be pleased to state:

(a) whether the power situation in the country is getting worse;

(b) if so, whether priority will be given for power generation in Eleventh Five Year Plan;

(c) whether the target for Tenth Five Year Plan for power generation has been achieved, if so, details thereof, State-wise and category-wise as on date; and

---

†Original notice of the question was received in Hindi.

(d) if not, the details of reasons for the same?

THE MINISTER OF POWER (SHRI SUSHIL KUMAR SHINDE): (a) There is overall shortage of power in the country. The shortages vary from State to State and season to season, as well as times of day depending on the demand and supply of power. Peak and energy shortage during 2005-06 and 2006-07 (upto Feb., 2007) is given below:

	Peak shortage	Energy shortage
2005-06	12.3%	8.4%
2006-07 (upto Feb., 2007)	14.2%	9.5%

(b) The National Electricity Policy envisages "Power for all by 2012" and per capita availability of power to be increased to over 1,000 units by 2011-12. To achieve this, total capacity addition of about 1,00,000 MW is required during 10th and 11th Plan period, out of which a capacity of 23,250 MW is likely to be added during 10th plan. The capacity addition of 76,460 MW comprising 16,253 MW Hydro, 57,047 MW Thermal and 3,160 MW Nuclear has been provisionally proposed. Out of 76,460 MW, a total 44,358 MW (58% of the proposed capacity) is already under construction.

(c) A Capacity addition target of 41,110 MW was envisaged during 10th Plan (2002-07). At the time of mid-term appraisal, based on the project preparedness, Planning Commission assessed that 31,290 MW was feasible during the 10th Plan. As against this target, capacity addition of 19,010 MW has been achieved during 10th plan (upto 7.3.2007). State-wise/sector-wise/Category-wise capacity addition target and actual capacity addition upto 28.02.2007 are given in Statement-I and II (See below).

(d) The main reasons for non-achievement of the plan target include (i) delay in technology tie-up for super-critical thermal power projects, (ii) slippage of hydro projects mainly due to delay in clearances, investment decision, award of works, geological surprises and court cases, (iii) delay in financial closure of private projects, (iv) delay in critical supplies by the equipment manufactures, and (v) non-availability of adequate gas.

Statement-I

State-wise/Sector-wise/Category-wise capacity addition target during xth Plan as per 41110 MW
